Baby+Company

Overview & Payment Structure
WELCOME

Cara Osborne, CNF
Chief Operating Officer
Baby+Company
Consumer demand and cost trends are driving interest in ‘out of hospital birth’

1. **U.S. maternity care is high cost**
   - One of the largest contributors to health bill ($100bn/year)
   - Among the top 5 hospital costs to payers

2. **Women are increasingly interested in out of hospital birth**
   - 25% of women said that they would prefer a birth center birth if one were available; another 39% would consider it
   - 30% increase in out of hospital birth since 2010

3. **Lowering the Cesarean Section rate in the US is a high priority and maternity centers can play a role**
   - National average rate of 33% versus 6% average in birth centers in the US.
   - W.H.O recommends rates of between 5% and 10%.
   - ACOG has made lowering the rate a top strategic priority and suggested that expanding access to birth centers could play an important role in improving outcomes

Outcomes that are as good or better than hospital based care

1. **Lower cesarean rates**
   - C-section rates of 6%\(^1\) vs. 26.9% for women with low-risk pregnancies in the United States\(^2\)

2. **Outcomes that are as good or better\(^1\)**
   - Morbidity or mortality rates that are as good or better than hospital based care
   - Higher breastfeeding rates
   - Lower NICU Admissions rates

3. **Wellness benefits that extend beyond the maternal episode**

Significant savings

Savings come both from a reduction in the number of cesarean sections and a reduction in the cost of vaginal birth.

Labor + Birth Care

Early Labor
- TouchCare/Phone Consultations

Active Labor
- Continuous Midwifery Presence

Birth + Postpartum/Newborn Recovery
- Fetal Monitoring: intermittent auscultation of fetal heart tones using dopplers
- Range of Comfort Measures: self-directed movement; nitrous oxide; water birth
- Additional Skilled Support

Until 4-12 hrs. Postpartum
- Preparation for Early Discharge

Preparation for Early Discharge
- TouchCare/Phone Consultations

Range of Comfort Measures: self-directed movement; nitrous oxide; water birth

Fetal Monitoring: intermittent auscultation of fetal heart tones using dopplers
Postpartum and Newborn Care

- **24 hrs**
  - TouchCare/Phone Visit
  - Home Visit

- **48 - 72 hrs**
  - Individual Visit (Mom + Baby)

- **1 week**
  - Individual Visit

- **4 - 6 weeks**
  - Individual Well Woman Visit
  - New Mom’s Group

- **4 - 6 months**
  - TouchCare/Phone Consultation PRN
  - Lactation Counseling
Summary of Work With Payers

1. We are working with payers to set pricing based on the outcomes we deliver (healthy mom and baby) rather than the inputs we are using.

2. With most payers we are establishing a single episodic case rate for our birth clients that covers both the facility and professional fees (and a set of other services). With this structure, we are incentivized to deliver a healthy mom and baby and a happy family at the lowest possible cost.

3. With some of our partners we earn an incremental percentage at the end of the year if we hit certain quality markers.

4. Our pricing structure has limitations in that it is set up for birth center care and if a patient transfers to the hospital, payers will pay an incremental cost to the receiving providers.

5. However, our current rate structure sets a price benchmark for the episodic cost of low-risk uncomplicated birth as it demonstrates that it is possible to deliver high outcomes and a high touch service at a low cost.

6. We are currently working with our health system and physician partners to more closely integrate our services and could ultimately negotiate a single birth price for any patient that initiates care at the birth center (even those that ultimately transfer), thereby adding a true risk sharing element to our pricing structure.
We have set episodic case rates for birth and transfer clients

Baby +Company as a Purchaser

- ~100 employees

- Interest in offering maternity care for our employees that is in keeping with the care that we offer the families that we serve

- As a small company we have limited leverage in plan design

- The plan that was the best fit for our employees broadly isn’t contracted with us as a provider
